# ARCHIWARE

MALGN

KeyFlow by Malgn Technology and Archiware P5 Archive

Media Asset Management

In broadcast and production environments, the use of a Media Asset Management systems is the best way to keep track of video, audio and image assets at all times. Ideally, it also provides access for all users in order to enable collaborative work and around-the-clock, around-the-globe availability.

KeyFlow Standard by Malgn Technology is a powerful MAM system which provides all these features and more: it fits into existing storage setups and uses technical infrastructure such as transcoders to create simplified, automized workflows. Content and metadata are managed centrally and are available to the user in the desktop application as well as a web client and a mobile app.

Another important step in the workflow that should have top priority is the migration of content that is no longer in daily use onto secure media. To do just that, **KeyFlow is integrated with Archiware P5** Archive to provide a simple and safe solution for archiving content on disk or tape.

Media can be archived and restored from within **KeyFlow Standard** with just one click. All processes can be set up and monitored within P5 Archive.

P5 Archive supports LTO drives and libraries from virtually any manufacturer such as **Overland-Tandberg, SpectraLogic, IBM, HP, Oracle and Quantum,** so it can be run in any storage environment.

To add an additional level of security, P5 can also clone tapes to create a second set for offsite storage.

Scalability regarding performance and number of archive and restore jobs running simultaneously is provided by the Archiware P5 Archive parallel-ization feature.

P5 Archive Advantages:
✓ Browse Media with Previews/Proxies
✓ Add & Search Metadata anywhere, anytime
✓ One Solution for all Platforms (Mac, Win, Linux)
✓ Archive & Restore directly from KeyFlow
✓ Saves online storage space thanks to easy archiving
✓ Long-term Storage on Tape or Disk
✓ Tape cloning for extra security and off-site storage
✓ Parallelization for even higher performance
✓ Combine with P5 Backup & P5 Synchronize
